

Symposium on second generation sequencing

28th of September 2011, 13.00-16.00

Lundbeck Auditorium, Biocenter, Ole Maaløes Vej 5

Programme:

13.00-13.20: *Hunting our genetic past*, Eske Willerslev, GeoGenetics

13.25-13.45: *High-throughput DNA sequencing for genome-wide mapping of transcription factor binding and chromatin modifications*, Jesper Christensen, BRIC

13.50-14.10: *Exploring new territories in microbiology using high-throughput sequencing*, Lars Hestbjerg, Section for Microbiology

14.15-14.45: Coffee break

14.45-15.05: *Biogenesis and function of small RNAs within gene bodies*, Albin Sandelin, BINF

15.10-15.30: *Isoform Detection and Quantitation using RNA-seq*, Johannes Waage, BRIC

15.35-15.55: *Sequencing Centre, what do we offer?* Morten Rasmussen, Sequencing Centre
